Professional Experience			
	IT Intern, *General Dynamics C4S*		May 2011 – June 2011
	Utilized AJAX calls on SharePoint web services with SOAP envelopes that updated form data and reduced server load		
	Developed custom jQuery carousel plugin for fluid layouts that can adjust the amount of visible images when the browser resizes		
	Created a new site layout that uses CSS3 border radius and box shadows and gracefully degrades in older browser versions		
	Collaborated with multiple entities of IT to develop and redesign standard SharePoint sites to deliver a more customizable and effective experience to the customer		
	Created a script in C# that interacted with Active Directory to provide specific attributes		

Relevant Work Experience			
	Doccelganger		
	Developed in Node.js, Twitter Bootstrap, and Express framework and asynchronously converts Word documents to PDF/ODT/HTML/DOCX formats Implemented web sockets(Socket.io) to provide realtime updates on finished converted documents Utilized XHR2 to dynamically append extra form data		

Education/Relevant Coursework			
	Arizona State University (GPA: 3.79)		May 2012
	Computer Information Systems (BS), Management (BS)		

Applied Problem Solving with C# .NET
  Coursework covered concepts such as encapsulation,
  classes, instances, and inheritance/polymorphism

Systems Design/Electronic Commerce
  Modified WordPress' standard registration to allow
  additional registration fields to be entered
  Integrated login/registration system with OAuth
  Optimized site with SEO, CDN, and minified files

Object-Oriented Modeling/Programming
  Covered concepts such as System Development Life
  Cycle and UML
  Created class, use case, and sequence diagrams using
  Astah

Business Database Concepts
  Modeled databases with entity-relationship diagrams

Technical Skills		
Languages: Javascript/jQuery, CSS, Node.js, XML, Jade, C# **Concepts:** OOA/OOD, MVC, obfuscation, version control (git), AJAX, REST **Software:** Photoshop, vim **Systems:** Windows XP/7, Mac OSX, Linux, EC2 (Elastic Cloud Compute)
